## From Fruit to Bars

**40 years  
of competence**

**1**

Selected raw materials such as dried fruits, marzipan, cornflakes and fruit preparations are mingled in a special kneader until a compact fruit batter emerges.

**2**

The batter is then rolled out as a flat carpet and covered with thin wafers on top and bottom.

**3**

The fruit carpet is now cut lengthwise and across into many tasty fruit bars.

**4**

After passing through careful quality controls, the bars are taken to the packing machine ...

**5**

... and receive their appetizing, fruity packaging.
